

Cyberpunk worldbuilding with mobile AR workshop

21/11/2026

Duration: 3h **13:00- 16:30**

Bring your own laptop

Are you ready to escape the confines of physical reality? In this era of oppressive tech giants and surveillance states, it's time for creatives to seize the means of collective imagination and build our own counter-narratives about possible futures. In this workshop we will use the free mobile AR app and web-based 3D engine **Hoverlay** as our technological playground to create our own virtual worlds using 3D models, animations, 360° scenes, sound, text and video. Prior experience with XR is not necessary. Bringing a laptop and smartphone is!

The workshop will be primarily be held in English but Swedish can also be used.

At: KinemaLab, Studio 4

Address: Polstjärnegatan 14, 3rd floor

(pls communicate if you would like access to the elevator)

Sign up: by sending an email to yivo@gothenburgstudios.se (limited amount of participants)

Amy Boulton is an artist based in Stockholm working with XR technologies. She is co-artistic director and project lead of the newly released XR drag show "CULT of the Cyberpunks", in collaboration with @cultofdrag.
